### CLARESHOLM LOCAL NEWS

G. R. Maxwell has been on the sick list for the past week.

Mack's Melody Makers will play for the annual military ball at Macleod.

Harry Mosley has returned from spending a couple of months in California.

Henry Viets has returned from Spokane to look after the spring work on his farm.

Many farmers in this district have started work on the land during the past week.

Mr. and Mrs. E. J. Daluin have returned from California, where they spent the winter season.

S. L. Fraser has moved into his new office rooms on Railway street, next door to J. L. McCrimmon's.

Mr. and Mrs. P. T. Gibbie and Mr. and Mrs. Alf. Lewis have returned from spending the winter in California.

Mrs. Brookes-Avey, of Lethbridge, arrived on Wednesday for a two weeks' visit with her sister Mrs. R. N. Beattie.

J. W. Hallett has moved into the Honey house opposite Harry Don's, where he is offering for sale some furniture.

Come, greet with us the message of spring time, in the Parish Hall, Saturday, April 3.—Ladies of St. John's Guild.

Mr. and Mrs. J. E. Hagerman entertained Dean Howes, of Edmonton University, while in Clareholm this week.

Mr. Carl Morgensen of Noble is moving to town to succeed Mr. J. W. Hallett as manager of the Imperial Oil Ltd.

Word comes from Rochester, Minnesota, that Leonie Clark, who recently underwent an operation in the Mayo hospital, is progressing favorably.

Fletcher Johnston, from Grass Lake, moved to Clareholm district last week with two cars of settler's effects, and has settled on the McKay farm west of town.

Easter services at St. John's Church of England will be held as follows: Good Friday at 8 p. m., evensong; Easter Sunday, 4 p. m., April, at 9 a. m., holy communion.

Word comes from Calgary that Charley Romain is progressing favorably and it is expected that he will be out of the hospital in a few days.

Do you fancy a home-cooking sale at Easter time? The ladies of St. John's Guild will be pleased to welcome you at the Parish Hall on Saturday, April 3, from 3 to 6.

Alex. May of Edmonton, Past Grand Master and present Sovereign Grand Representative, I. O. O. F. for Alberta, was a visitor at Foot Hill Lodge on Monday evening.

So sorry I can't accept your invitation, but I have a previous engagement with "Madame Charming" for Saturday afternoon at the Parish Hall. The daffodil tea you know.

The frost coming out of the ground has played considerable havoc with Clareholm streets of late. Several autos and heavily loaded wagons have been stuck in the soft spots.

Come one, come all. Let the "V" girls entertain you at their pageant on Monday, March 29th, at the I. O. O. F. Hall. There will also be many other interesting features. Admission: adults 35c, children 15c.

Following several days of high wind and much dust, there were showers and a light fall of snow Tuesday and Tuesday night, with a drop in temperature to 14 degrees below the freezing point on Thursday morning.

Forty horses, ages from five to nine years, most of them weighing from 1400 to 1650, the property of C. E. Furman of Taber, will be sold by public auction at the Thos. Moore barn, two blocks west of power house, Clareholm, on Saturday afternoon, March 27. These horses are well broken and grain fed. A. E. Runnins, Auct.

A few golden daffodils will lend charm to your Easter table. Our little flower maids will be pleased to serve you on Saturday, April 3rd, in the Parish Hall.—Ladies of St. John's Guild.

"Rugged Water," with Lois Wilson, Wallace Beery, Warner Baxter and Phyllis Haver, at the Rex theater Friday and Saturday nights this week. "The Signal Tower" Monday and Tuesday next.

Directors of the Clareholm Park Association met representatives of the town council on the 18th inst. and accepted an offer of the council whereby a lease would be granted to the Association for five years at an annual rental of \$22.00 and a condition that all sums on hand after paying expenses would be expended on improvements. It is the intention to build a grand stand as soon as possible and Messrs. Hood and Maxwell were appointed a committee to present estimates and plans for a stand capable of extension but in the first instance to hold 200 people. Plans for planting trees were also discussed. It was decided to hold the spring sports on Monday, 24th May.

**Mrs. Matthew Schumacker Dies at Age of 84 Years**

Mrs. Matthew Schumacker, age 84 years, died on Sunday night from influenza and bronchitis.

The late Mrs. Schumacker was born in Austria, coming to Canada when four years of age, with her parents, who settled in Ontario, where she lived till about six years ago when she came to Clareholm district to stay with relatives.

She is survived by three sons and two daughters: Jacob Schumacker and Joe Schumacker of Clareholm district, Wendell Schumacker of Castor, Alberta, Mrs. J. Schlosser of Staveland, and Mrs. Oshell, of Trout Creek, Ontario.

The funeral service was held at Staveland on Wednesday, when six of her grandsons acted as pallbearers.

### BRUNNER—RUSTIN

On March 10th, at the home of Rev. Scott Bates, Kalspell, Montana, Miss Manda Rustin was married to Mr. J. John Brunner, a prosperous young farmer of the Columbia Falls district.

The bride wore a lovely grey silk dress trimmed in blue, with a pretty blue coat trimmed in grey and grey hat to match.

Miss Beth Crawford was bridesmaid and wore a pretty tan spring suit. Mr. Joseph Brunner, brother of the groom, attended him.

Their many friends unite in wishing the newly married couple a long life of happiness.

On Tuesday afternoon, March 29th, Mrs. Mike Brunner and Mrs. Ed. Farrington gave a shower for the bride at Mrs. Brunner's home, when she was the recipient of many beautiful beautiful gifts.

The bride was a former Clareholm girl and has many friends here who join in extending best wishes.

### TOWN OF CLARESHOLM ASSESSMENT ROLL 1926

Notice is hereby given that the assessment roll of the Town of Clareholm for the year 1926 has been prepared and is now open to inspection at the office of the Secretary-Treasurer of the Town from 10 o'clock in the forenoon to 4 o'clock in the afternoon on every day which is not a public holiday, except Saturday, and on that day from 10 o'clock in the morning to 12 o'clock noon; and that any taxpayer who desires to object to the assessment of himself or of any other person must within thirty days after the date of this notice lodge his complaint in writing at my office.

Dated this 12th day of March, 1926.  
Thomas A. Murray, Assessor.

## TWINK

A Dye in the form of soap flakes that requires no boiling. Easy to use and dissolves quickly. Dyes any kind of material the most brilliant colors. Woollen goods can be dyed and kept beautifully soft.

Twink is made by the makers of Lux.

We carry a full assortment of colors.

PRICE 15c PER PKG.

## Joint Swine Committee Holds Meeting To Consider Problems Affecting The Swine Industry

A meeting of the joint swine committee for the Dominion of Canada was held at Toronto on February 13th and 14th. The committee, comprising Messrs. C. M. Leach, president of the Saskatchewan Swine Breeders' Association, representing the Western Canada Livestock Union; J. Duff Drien, Blenheim, Ont., representing the Eastern Canada Livestock Union; M. N. Rodrigue, Quebec, representing the Provincial Swine Breeders; S. E. Todd, Toronto, representing the Industrial and Development Council of Canadian Meat Packers; and the secretary, L. C. McNeil, Dominion Livestock Branch, Ottawa, is under the chairmanship of A. MacMillan, chief of stock and swine division, livestock branch, Ottawa.

Problems of importance in connection with the further development of the Canadian swine industry were under consideration, and an attempt is being made to provide solutions and to direct the future development of this profitable industry on sound and profitable lines.

In view of the comparatively high prices for hogs which have prevailed throughout the past year, producers undoubtedly are endeavoring to interpret the future position. The committee adopted a report submitted by F. C. McNeil, branch specialist, Dominion Livestock Branch, which reviews the development of our export trade and the situation pertaining to hog production in connection with our chief competitors. This report emphasizes the importance of a continued improvement in the quality of hogs of the approved bacon type and is encouraging in that it sets forth the comparatively sound position of the Canadian producer in regard to the future.

The committee was impressed with the importance of the continued production of hogs more evenly throughout the year, in order to supply a steady volume of fresh product to the British consumer. Swine, it was felt, would be extremely important when the new order of the British Ministry of Health, prohibiting the importation of hogs into effect on January 1st, 1927. It was also felt that the reworking of production will work out to the ultimate advantage of the producer in that it will tend to maintain a more even level of prices throughout the year.

It can be brought about in two ways, first, by increasing the number of sows which farrow two litters a year, and second, by having the farrowings of these bearing only one litter a year distributed throughout the spring and summer months. Steps are being taken to accomplish this by experimental stations, agricultural colleges and demonstration farms in securing further data on the economic extent and limits of the production of sows, and it is hoped that reliable experimental data and actual demonstration in a more even distribution of our hog production throughout the year.

The seasonal underfeeding and overfeeding of hogs and its effect on our export bacon trade was another subject which received the attention of the committee. It was stated that the past two years furnished an outstanding example of the swing from underfed hogs during part of 1924 and the early part of 1925 to the tendency to excessive fattening which has developed since last fall. The damaging effect of such a practice is that it makes it impossible to maintain a steady supply of export bacon of the same quality from one year to the other.

The committee gave consideration to the system of advanced registration for imported swine, which has already been before the breeders. During the coming year small subcommittees will endeavor to bring the best judgment of the pure-bred breeders to bear on this question with the object of evolving a practical plan.

In reviewing the various factors which hinder the practice of buying hogs on a graded basis, the question of weighing facilities at country points received considerable attention. It would seem that a great deal exists in the way of scales, but that in a great many instances, particularly in Western Canada, these are not well located, neither are they well equipped for weighing hogs. Furthermore, no definite method is in existence which will contribute to the establishment of confidence in the accuracy and reliability of weighing at country points. The committee is agreed that proper facilities for weighing hogs at country points would tend to improve the quality of hogs produced as the final weighing and grading of the hogs when the shipper is present is most effective by way of education.

W. N. U. 1618

## Alberta's Wheat Crop

Average Yield Over Total Acreage Maintained at Eighteen Bushels

In view of the conflicting statements which have been broadcast concerning the extent of Alberta's wheat crop of 1925, Colby G. Duff, publicity committee for the province has issued the following statement in accordance with the facts obtainable. "It is now fairly certain, from the returns received by the department, that the average yield of all wheat over the total acreage will be maintained at 18 bushels, which is somewhat higher than at first estimated. The total acreage is placed at 5,578,745, on which an average of 18 bushels gives a total yield of 100,415,622, or approximately 100,000,000 bushels. Allowing approximately 3,000,000 bushels for seed, this leaves a total for marketing of approximately 97,000,000 bushels."

## In Interest Of Agriculture

Eastern Settlers Try Evolve Cure For Bovine Tuberculosis

Under the direction of Dr. J. T. Fitzgerald, director of the Connecticut State Laboratories, and with the help of a distinguished French doctor, the University of Toronto has taken in the interests of agriculture in the hope of securing a cure for bovine tuberculosis. The announcement of the step, which has been taken in the interests of agriculture, was made by Dr. H. J. Cody, chairman of the board of governors of the university, in an address to the annual dinner given by the Canadian National Exhibition to livestock breeders and exhibitors at Toronto.

## Trade With United States

Canada Exported More Goods to U.S. Last Year Than Any Other Country

Canada exported more goods to the United States during the year 1925 than any other country in the world, according to a report of the U. S. department of commerce. In the matter of purchases in the United States, Canada ranked second only to Great Britain. Canadian exports for the period reached a value of \$46,742,560, while imports from the United States totaled \$60,742,560.

## Saskatchewan's Registered Seed

Large Shipment Has Been Forwarded To South America

A shipment went forward recently to Buenos Aires, of 50 tons of pedigree Marquis wheat and 20 tons of pedigree Banner oats, said to be the largest consignment of seed grain shipped from Canada.

The shipment was consigned by the Moose Jaw branch of the Canadian Seed Growers Association, and was bought by the Banco & Bors Grains Corporation of Buenos Aires.

## A Native Of Africa

Hippopotamus is a Greek word meaning river horse. The animal bearing this name is a native of Africa. It was known to several ancient classical writers, but not correctly described. Hippopotami were hunted at Alexandria by Emperor Augustus about the year 135 A.D. The first one brought to England arrived in London on May 25, 1850, and was placed in the Zoological Gardens, Regent's Park.

## The Industrial Goat

Too Wide A Range Between Prices of Producer and Retailer

There is too wide a range between the few cents the cattle grower receives for his beef on the hoof and the 40 cents a pound the retailer rings up on his cash register; there is too wide a range between the few cents he pays his hands and the \$10 a week the same hand can earn in the dressing room. The same is true in every line of soil industry. The farmer is the agricultural and industrial goat. His labor is held of small account; his produce is made the sport of gamblers; he is left with insufficient funds to properly equip or man his plant and yet the world is absolutely dependent upon the tiller of the soil for its sustenance—Los Angeles Times.

## A Good Start

Bert. Donaldson—James, where are all your shorts today? Every one has missed the target. James Williams—I don't know, Sergeant. They left here all right.

## A Problem Of Hatching

Low Humidity In Incubators Cause Lack of Success

Complaint having been made by poultry breeders using incubators that it was difficult to get good hatches in March and April, investigation followed by tests to ascertain the cause, was undertaken at the Lethbridge, Alta., Dominion experimental station. It was found in tests made in 1923 and 1924 that none of the incubators employed gave satisfactory hatches at the humidity usually obtained, but that when moisture was added up to a humidity of 55 to 60 per cent. there was an increase in both the number of eggs hatched and the vitality of the chicks produced. Of several methods tried the most successful was to use a pad of paper and brush made by wrapping alternate layers of the two around a piece of cardboard until a pad about an inch thick was formed and five inches long was formed. This was saturated with water and hung in the top of the incubator about three inches from the radiator pipes. In a 200-egg machine the use of one pad, says the superintendent in a report for 1924, moistened when the humidity was turned off, if the pad was dry, was sufficient to maintain the required humidity. (On the twentieth day the pad was removed and the machine run dry until the last turning of the eggs, when the saturated pad was again hung in the incubator and left until the chicks were hatched. By this method, other conditions being favorable, there appears to be no reason why the eggs should not hatch. Hatches should not be obtained at any time with good eggs.

## Bring Money Into Canada

Settlers From U.S. Brought in \$16,470,553 in Twelve Years

United States citizens settling in Canada during the past twelve years brought with them wealth in cash and securities totaling \$16,470,553. In the statement for the last fiscal year of the department of immigration and colonization, figures are given for the past 12 fiscal years. The biggest year was that of 1912-13, when settlers from the United States brought \$2,755,545 to the Dominion. The lowest year was that of 1915-16, when the total was \$5,065,049. In the last fiscal year it was \$6,727,125.

In the last 14 years Michigan sent more of its citizens to become Canadian citizens than any other state. Settlers from Michigan in that period totaled \$7,807; from Minnesota, there were \$6,822 migrants to Canada; from Massachusetts, \$5,750; from Washington, \$5,466; from New York, \$7,687; and from North Dakota, \$1,042. The total value of goods brought to the United States varied from \$200 to a few hundred dollars.

## Production Of Hops

Hop production in Canada will be doubled, the British Columbia department of agriculture states, when 1,000 acres are to be purchased for this purpose, on the reclaimed area at Lale Bed at a cost of \$250,000 and brought under cultivation.

Conductor—You must pay full fare for the boys, or they will not get on. Madame—What? Do you honestly think he's that old? Conductor—Think he's that old? Why, lady, at first glance I thought he was your husband!

## Opportunities In Canada For The Farm Worker To Ultimately Achieve Independence

### Accomplished Valuable Work

Late John C. Barron Led The Foundation of the Northern Bred in Western Canada.

The death of John C. Barron, of Carberry, removes from the circle of western livestock men one of the most prominent and successful breeders of the Northern Bred in Western Canada, and in who did some of the most constructive breeding that has been done in Manitoba. His own herd was dispersed for several years, but all up and down the province, and, indeed, throughout the prairie west, are to be found herds that have strains of his breeding.

Homebred in the seventies, late John C. Barron, and no backer except his own practical experience in breeding in the east and succeeded in bringing up a herd that was one of the most talked of herds in the west. The famous herd, "Laverdier 47," the better that was the prairie west, and was a champion of the "A" circuit of western fairs, and Junior champion of the Dominion livestock show in 1913, was bred by Mr. Barron, and Star of Hope was a noted champion of his breeding. Mr. Barron has passed on, but his work as a constructive breeder has left an indelible impression on the northern herds of Manitoba and to a considerable extent on the herds of the three prairie provinces.—Free Press.

## Alberta Honey Production

Alberta Apiculturists Are Enthusiastic Over Prospects of Industry

E. Marks, of Lethbridge, was selected president of the Alberta Beekeepers' Association at the annual meeting at Lethbridge. R. G. Shultz, of Stirling, was re-elected vice-president. Mr. E. Marks, Lethbridge, has been at the experimental farm, secretary-treasurer, said the following directors: W. H. Hutton, Lethbridge; A. J. Morris, Lethbridge; R. H. Baird, Brooks; and D. Chalmers, St. Edmonton. The beekeepers are enthusiastic over the prospects of the industry.

Forty tons of Southern Alberta honey, the product of the usual crop of alfalfa fields of the Lethbridge district, have been handled by one wholesale firm there. This firm paid out \$12,000 to three honey producers of the district, the Heider, Rose and Key dairies. The Heider dairies produced \$2,000 worth of honey alone in 1925, valued at \$9,000.

## Grit Is Important

In Egg Production

Nearly Pure Calcium Carbonate Is Considered Best

It is generally well known that a large part in egg production has hitherto been supplied, according to Dr. Kaup, of North Carolina State College, by the use of granite. Granite, they say, does not matter what they can get bright, hard limestone. The latter, it was found, was hard and gave the grinding wheel a fine surface and gave a supply of calcium carbonate to supplement the natural content of the feed. The egg shell consists of 91.4 per cent. pure calcium carbonate, and when the latter is lacking in the hen's food, production is retarded. The best grit is nearly pure calcium carbonate. Several grits on the market contain large percentages of magnesium causing kidney disease and diarrhea. Other grits contain acid forming materials, rendering the reaction of the blood on the acid side.

## Women Adapted To Dairying

British Dairy Farmers Prefer Them To Men Workers

British dairy farmers especially welcome women as helpers because, they say, it has been proved that women are better adapted to dairying than men. In the country devoted to the dairy industry a great many dairymen are now employed than men. Demand for the new land girl has doubled in less than a year and the Women's Land and Garden Association is having difficulty keeping up with requests of farmers for this class of workers.

The Girls: "Oh, don't see people get off when they use a car." The Man: "Well, some certainly do get a habit of running other people's cars."

Alberta Fish Industry Probably no feature of the Coolidge One Hundred and fifty thousand administration has proved so popular with the country as the president's plan to increase the production of fish.

Most of this product went to Chicago, for distribution from there. Last year the total value of fish shipped was \$2,416,645, a bulk of it going direct to Great Britain.

Coolidge's Glass Economy Probably no feature of the Coolidge administration has proved so popular with the country as the president's plan to increase the production of fish.

The first needles were the thumb of plants.

Looking forward to spring, it is already appropriate to say a word on again to the opportunity existing in Canada for the achievement of agricultural independence. Many signs would indicate that this opportunity is but inadequately recognized. In the early months of the year the Canadian Pacific Railway conducts a survey late the requirements of farmers in territory along its lines, and thousands of farm labor vacancies disclose themselves, the great majority being for all-year-round employment. The demand for this help covers many European countries in scope, but every year the wants of many of the applying farmers go unsatisfied. Yet, unquestionably, farm labor in Canada is one of the widest chances leading to a future independence existing today.

The farm laborer in Canada today is the farm owner and independent agriculturalist of tomorrow. It is the acquisition of this profession in which the student is paid during his years of apprenticeship. It is truly safe to say that the greater number of farmers in Western Canada today started their agricultural careers as farm laborers, and others would have been there had they not the time and slow coming success in a lack of this preliminary training. Authorities are reiterating more forcibly ever that the best training is necessary for farm management in Western Canada, and the general desire for this training is a tribute within the possibility of most healthy individuals.

Farm labor has not an altogether new sound to certain circles of European life, but conditions, it must be realized, are very different in Canada. The "position" of farm labor is not in the Dominion. There is no farmer is a worker and there is no more dignified calling than that of the tiller of the soil. Most of every class of occupation, profession and calling follow it, and extract the utmost satisfaction from it. Many of the men who come to Western Canada to be workers on their own farms are increasing every year.

Lord Haldane, for example, who, since 1919, has become a successful Alberta farmer, appreciated the necessity of this preliminary practical training before undertaking the operation and management of his own farm, and placed himself as an ordinary worker under an experienced farmer in order to gain this experience. So keenly is he convinced that such a course is inevitable to the successful young man from Europe that he has lent his own experience and training to the benefit of others through teaching years of experience in Northern Alberta. His pupils now include members of some of the first families in the Dominion who do not farm labor derogatory, but, on the contrary, have a high appreciation of its dignity.

There is no doubt that many young men unemployed or dissatisfied with prospects would, could the opportunity be offered, of securing a farm of their own in a few years and achieving an entire independence, be driven home to them, take advantage of the scheme. No matter what the standing of the aspirant, farm training in the methods of Canada is necessary for graduation to farm management, and the farm labor scheme offers the chance of earning whilst learning.

## Butter Production In Manitoba

Has Exceeded Over Million Pounds in Last Two Years

Exports from Manitoba of 315 carloads of creamy butter, as against an import of 20 carloads in 1914, is the record set by the dairymen of the province during 1925, according to the annual report of the provincial dairy commission. Last year Manitoba produced 1,663,312 pounds of butter, an increase of 1,030,508 pounds over 1924. It is estimated that 1,600,000 pounds of butter was shipped to the United States from Southern Manitoba alone. The total export from the province was 7,764,000 pounds, valued at \$2,416,645, a bulk of it going direct to Great Britain.

The first needles were the thumb of plants.

WORLD HAPPENINGS  
BRIEFLY TOLD

Tentative plans for extension of the flight of the Spanish trans-Atlantic aviators headed by Commander Ramon Franco, have been abandoned.

Premier Bruce, of Australia, has announced that his government was considering a plan to reduce ocean fares for immigrants.

Burial beneath an avalanche of snow which he was clearing away, Robert Muldrew met with suffocation at a lumber mill in Vancouver.

Edward Noble, prominent British Columbia Orangeman, who walked in a parade there last July when he was 85 years old, died on Feb. 21 at Cedar Cottage, a suburb.

A resolution calling for the abolition of the stamp tax was unanimously carried during the third and final convention of the Royal Lumber Dealers' Association of the province of Quebec, attended by some 100 delegates.

France intends to give the Syrian people a form of government resembling that given to Iraq by the British. Count Robert de Caumont, director of the League of Nations.

Hon. H. W. Newlands, K.C., has been reappointed Lieutenant Governor of Saskatchewan. Mr. Newlands has been Lieutenant Governor of the province since February, 1921, when he succeeded Sir Richard Lake.

The present serious industrial crisis in Germany is forcing many firms to restrict their operations completely, and the number of unemployed in the Ruhr district, especially, is increasing daily.

A British government air service for passengers, mail and small freight, between Cairo, Egypt, Burma and post-offices, is in the making, according to Maj. General Sir W. Bracken, director of civil aviation in the British air ministry.

Right Hon. W. L. Mackenzie King, Prime Minister of Canada, has been officially declared as a member of the House of Commons for the federal constituency of Prince Albert.

Triflingly uniformed diplomats and officials paid their respects to the King at the first levee of the season, held at St. James' Palace recently.

Political Trickery  
Menace To Democracy

Sir Arthur Currie Says Present-Day Politicians Suffer in Comparison to Lincoln

Abraham Lincoln was a man whom Canadian politicians would do well to emulate, said Sir Arthur Currie, G.C.M.G., principal of McGill University and former commander of the Canadian corps, in an address at Montreal.

While Sir John A. Macdonald alluded to the Congress of the United States, Sir Wilfrid Laurier to the Liberals, the great United States commander bent the knee to no party, political, moral or social.

Sir Arthur contrasted Lincoln with men of lesser qualities. "The political politician," he said, "is a man who appeals to the passions of the crowd in order to get votes. He often acts against what is right, and his political trickery, for he cannot be called strategy, is the danger of democracy."

## Canada and the Locarno Treaty

No Action Necessary to Remain Outside Terms of Pact

Renowned government agent to disassociate Canada from the Locarno Treaty is officially denied. No action is necessary on the part of this Dominion to remain outside the terms of the treaty, as it expressly provides that the treaty shall not be binding on states which do not desire to be bound.

It is probable the government will make some announcement in the house regarding Canada's position.

Early in the present session, Hon. Ernest Lapointe, government leader in the house, said in reply to Mr. Meighen, that "no step will be taken by the government before parliament has been consulted on the matter."

He added that "our intention is certainly to have the matter discussed in parliament."

## Honor Belongs To Canada

The first trans-Atlantic cable from the Atlantic Ocean was the Royal Warrant, built in Canada in 1921. The honor of this achievement belongs to the Dominion.

A tablet commemorating the historic event is in the Parliament buildings at Ottawa.

Sunday School Teacher—"Some little boys are good and some are bad. What kind do you hear?"

Small Answer—"Good ones."

W. N. A. 1918

## C.N.R. To Build Branch Lines

Heavy Expenditure To Be Made This Year On Branch Lines in the West

The Canadian National Railway estimates of \$5,350,000 in 1926 on branch lines, is the estimate brought down by the government and tabled in the House of Commons.

Between 15 and 20 branches throughout the Dominion remain incomplete. On seven of these tracks will be built by the C.N.R.

The largest expenditure will be on the Burlington, Sask. branch, on which about 44 miles of track will be laid and \$1,175,000 expended.

A million dollars will be spent on the Danube-Central, B.C. branch, and \$915,000 will be spent on the Rosedale, Sask. branch, which will be practically completed this year.

At least two other branches will be practically completed this year, the St. Paul S.E. Alta. and the Acadia Valley branches, on each of which about half a million dollars will be spent.

A total of 163 miles of track will be laid on branch lines this year, under present plans, on each of which about half a million dollars will be spent.

On the last year's branch line construction it still to come. The three chief expenditures last year were \$1,200,000 on the Kootenai-Kelowna, B.C. line; \$1,232,000 on the Danube-Central, B.C. line; and \$1,095,000 on the Hahn-Warden, Alta. line.

These figures, says the statement from the railway department, are higher, however, incomplete, and do not include the cost of the bonds of the railway department.

For Cheaper Money

Western Merchants Launch Drive For Six Per Cent. Long Term Loans

Western merchants, farmers and producers are launching a drive for a six per cent. long term loan under the Rural Credits Act to be brought in by the government.

Representatives have been appointed to the effect that the opinion of most of the experts consulted has been that the farmers will have to pay 7 per cent.

It is the general view that, unless absolutely essential, the government should not guarantee the bonds of the rural credits organizations, and that, contrary to the practice in the United States, these bonds should not be taxable.

Without a government guarantee and without exemption from taxation on annual revenue bonds, the bonds, experts estimated, would have to bear interest at 5½ per cent. in order to sell.

At this price it would be essential to charge the farmers 7 per cent. at least one per cent. will be required for administration.

With government guarantee, the bonds could be marketed at less than 5 per cent. interest, which, after providing for administration, would give the farmer more than 6 per cent.

Most of the westerners claim that 6 per cent. money is essential, and that the government should guarantee the feature, would rather have 6 per cent. money than 6 per cent. for the money.

## Says Brain Never Tires

Cannot Be Overtaxed By Work Or Study, Opinion of Scientists

"The brain of the ordinary citizen, provided he takes to his ordinary study, is capable of holding any number of different vocabularies," Sir Deane Boscawen, famous research scientist, told the School of Oriental Studies, thus joining the select band of scientists who decline to admit that the brain can be overtaxed by work, reading or study.

Age previously, Sir Arthur Keith, Britain's leading anthropologist, had denied the idea that brain force was exhausted by work or study.

Keith even contended that brain work never tires; it is physical defects or disease, perhaps due to unbalanced feeding and neglect of the body, which concentrate on study, that results in the fatal collapse which are commonly known as "brain fever" or "overwork."

Developing the same theory, though on what different lines, Sir Deane Boscawen urged his hearers not to be scared by the fear of overloading the brain in their studies. There is practically no limit to the amount of knowledge or learning that the human brain can store up, he said.

First Recorded Eclipse

Eclipses were predicted by an Athenian, named Calippus, in the year 330 B.C.

The first eclipse recorded in history happened on March 19, 721 B.C., according to Ptolemy. It was an eclipse of the sun.

It was observed with accuracy at Babylon in Mesopotamia.

## Britain Discards Helicopter

Will Concentrate On Autogiro Type Which Is Much Simpler

The Brennan helicopter experiments, on which \$250,000 has been expended to date, will be discarded by the air ministry in favor of concentration on the autogiro type.

The ministry is credited with the intention of constructing four or five machines employing the principles of the Spanish "windmill" plane, which was built by Sir William Branker.

Alce White Marshall when it was tried out at Farnborough as "the greatest aeronautical invention since the Wrights' war."

Experiments with 'the helicopter' have been carried out in the closest secrecy for the last five years, but experts are now said to have come to the conclusion that the autogiro type achieves all that the perfected helicopter would have been able to do, while its principles are much simpler.

## Russia Competing For U. S. Trade

Preparing to Export Many Commodities During Next Six Months

Official Russian trade figures for the next six months, six billion dollars worth of goods, are being prepared to export to the United States.

The United States, officials say, will also be able to absorb about seven million dollars worth of sausage casings, 10,000,000 worth of wool for carpets, horse hair, and animal bones for engineering purposes.

Declaring that these commodities are now being purchased by the United States in England and Germany, they are Russian producers to compete for this trade.

## CLIPSE OF FASHIONS

Dragged Heavy Bags To Safety When Storm Broke

A desperate fight by Eskimos to save a winter's supply of coal from the elements has been reported by Dr. W. A. Nesbitt, a doctor of the Hudson's Bay Company, in the vicinity of Point Barrow, northern tip of Alaska.

The fuel had been landed on the beach from a supply ship when a storm, described as the worst in years, broke. Rain, accompanied by snow and hail, and with driving wind, had blown before it. The rising gas was being against the mammoth pile of stacked coal.

The only one remaining bright spot in the life of this Canadian soldier, whose offer stands until accepted, is the thought of his family.

He is now in the hospital, where he is recovering from the effects of the storm. He is now in the hospital, where he is recovering from the effects of the storm.

## ON THE AIR

What Is Doing in the World of Radio

G. B. Shaw says radio is doing service to theatre by training artists to perform without applause.

Reception of a radio program from Johannesburg, South Africa, on a three-set at London, Ohio, recently has been verified.

The storm heralds is being blamed by experts for unsatisfactory radio reception. There are now more reasons why the radio set will not work than there is—Hamilton Spectator.

An ordinary street light in an English town has the peculiar property of acting as a radio and wirelessly broadcasts radio programmes. The postman stops on his rounds to listen to a program.

A college which will broadcast all of its lectures and instructions has been inaugurated at Vienna, Austria. The daily courses will start at 10 p.m. and will last approximately two hours.

Rough usage harms many radio tubes, and causes the owner to purchase a new set before he should need them. Handling tubes, taking them out of the set, and using them often causes damage to them.

Five thousand dollars' damage was done at the Montreal radio station when a mouse came out of a hole, ran across a short circuit, blowing out 14 fuses. The night's program was abruptly terminated. The mouse was charred black.

Direct wireless telephonic communication with Australia, a distance of 12,000 miles, has been established by Frank Neill, an amateur radio operator, near Belfast, Ireland. The test lasted 15 minutes and the voice of a Melbourne cricket match was heard, which was distinctly heard. The wavelength used was 35 metres.

## War Veteran Would Help Others

Deaf and Almost Blind Offers Body For Research

Leonard George, chairman, aged 30, a former member of the 10th and 14th Canadian Battalions, departing of ever recovering from the silence of complete and permanent deafness and approaching blindness is still anxious to serve.

He has offered to submit his body to any scientific study or laboratory and to endure experiments in connection with the ailments which have brought about his present condition, for possible benefit to others.

Chairman has made his offer in a written document, full of pathos.

"People may think I am crazy," reads the document, "but I can assure them that I am in my right mind. The trouble I am deaf and my hearing and my eyesight is failing, and I am worried and tired. I am ready to submit myself to any scientific research laboratories or hospital or doctors for any purpose they want. I am deaf because life holds nothing for me now. Someone who is more fortunate than I may profit by what I have done in the research."

## Figures Explain Slow Recovery Of France

One-Seventh of Agricultural Population Killed in War

France lost 1,262,000 men in the World War, according to the official record, and with a view to showing how that loss has affected the economic life of the country, Gaston Doumergue, former president of the Paris Statistical Society, has drawn up tables disclosing how these deaths have been played before the war.

The biggest loss was to the land, 600,000 of the war dead had been farmers and hand workers out of a total agricultural male population of 2,600,000.

Industry gave 220,000 men, the largest figure with 225,000 out of 2,600,000.

Commercial pursuits, 150,000 men out of 1,257,000. The civil service gave 21,000 out of a total of 260,000 and the liberal professions 40,000 out of a total of less than 220,000.

One man in every twenty-eight in France was killed, one in thirty-five in Germany and one in sixty-six in England.

Even with the return of Alsace and Lorraine, the population of France is still less than it was in 1914. With a seventh of her agricultural male population killed, the slowness of France's recovery becomes somewhat more understandable.

## Advance In Radio

Transmit At Same Time On Same Wave Length

A Possibility of the simultaneous use of the same wave length for transmitting identical wave lengths is seen by engineers, with the announcement of an invention of L. William Skiles, youthful graduate of the Engineering School of the University of Prague.

Based upon what was said to be heretofore impossible, Skiles' invention permits the device presented to be used in a little in Skiles's laboratory at Berny, a suburb.

In addition it was declared that it would make possible wireless telephony for all purposes where wire service now is used.

Wished Him Well

Son—Father, I've been engaged to him nearly two years. Don't you think it's time I married him?

Father—Oh, I don't know; if you really like him, I think you should marry him happy as long as you can.

## Foolish Saving

A penny saved is not always a penny earned. Sometimes it is two pennies lost. The merchant who spends nothing on advertising loses much more than he saves.

The money spent for plate glass windows is not wasted, on as lost, nor is the money spent on better interior lighting.

Anything that increases the favor, that adds value, that multiplies customers is very properly regarded as a good investment.

Advertising is a good investment — just as plate glass windows are. Advertising sells you goods to more persons than shop windows do.

### A WORD TO THE PUBLIC

### BUSINESS LOCALS

For Sale—Seven roomed house. Terms. Apply John Dahl, U.F.A.

Lost—Gentleman's brown silk scarf, lost at Elks' dance on Feb. 12th. Finder please leave at the Review office.

For Sale—12 head of work horses, broken, ranging in weight from 1400 to 1650, ages from 3 to 7. Can be seen at Thos. Moore's farm, Clareholm.

We are offering for sale: 1 combination buffet and china cabinet, 1 linoleum rug, electric washing machine, and 1 bread mixer. Apply J. W. Hallett.

For Sale—Pure bred White Wyandotte cockerels, and setting eggs; also pure bred White Leghorn setting eggs. Call afternoons. K. G. Bissett.

For Sale—500 bu. Banner seed oats, threshed before the rain, 50c per bu. Also three tons of green feed, cut before the rain, \$22 per ton. Apply to John Dolsworth, Phone 2106, Clareholm.

From their mossy thrones, little flower maids will supply you with golden daffodils to grace your Easter table. Parish Hall, April 2d, at 3 p.m. Ladies of St. John's Guild.

### TENDERS WANTED

Tenders will be received at the office of the Indian Commissioner at Regina, Sask., for the purchase of the west half of Section Six (6) and the south half of Section Seven (7) in Township Twenty-seven (27), Range Twelve (12), east of the Fourth Meridian, containing Six Hundred and Forty (640) acres more or less; together with all buildings and appurtenances, stock and machinery belonging to or appertaining there to, as follows:

Fencing house grounds, stock yard, and entire farm fenced and cross fenced with woven wire and cedar posts.

Water Rights, irrigation ditch, two good creeks and good well and pump.

200 acres summerfallow ready to crop, 205 acres of stubble, 205 acres of pasture with creek running through, 30 acres Alfalfa.

Grain—800 bushels of feed oats, 250 bushels of wheat for seed.

Dwelling House—(1824), four rooms, two upstairs and two downstairs, with a lean-to kitchen.

Barn—Frame, single roof, cement foundation; built of one-ply shiplap; size 60x80; 40 ft. will accommodate about 40 tons of hay with carrier and slings.

Implement Shed—Frame, shingle roof, 18x20; height in front 10 ft., at back 6 ft.

One small log granary. Two other small outbuildings.

Hay Rake, John Deere, 10 ft. in fair shape. Sulky Plow, 14 ft. in fair shape. Hamilton 14 in. Gang fair shape. 2 McCormick Mowers, 3 ft. (old), 1 L.I.C. 13 tooth Duck-foot Cultivator, in good shape. 1 McCormick 8 ft. Rider (3 yrs. old), in good shape. 1 McCormick Binder (old). VanBrunt Double Disc Press Drill, 18 rows. Land Packer. Disc Harrow, 14 ft. John Deere. 1 Demolator (old). 4-section Lever Drag Harrows with Cart. Imperial Wagon Flyx3½, with 125 bushel grain tank, back spring broken. Farm Truck with Hayrack. 4 sets double harness (old). 1 set double harness with breeching. 1 set of small tools of no value. 11 head of Work Horses, consisting of—1 Mare 6 yrs. old, 1200 lbs. 1 Mare 6 yrs. old, 1600 lbs. 2 Geldings 6 yrs. old, 2800 lbs. 4 Geldings (aged), about 1400 lbs. each. 1 Saddle Pony; 1 aged Cow with calf at foot; 2 Cows, milked 1 two year old Heifer; 2 Brood Sows, due to farrow about April 1st; 75 Chickens; 15 tons Hay (alfalfa).

The usual Department terms of one-tenth cash and the balance in nine (9) equal annual consecutive instalments with interest on the deferred payments at the rate of six per cent (6.00) per annum will apply. Certified cheque for one-tenth of the tendered price must accompany each tender. No tender necessarily accepted. Tenders close Saturday the third day of April, 1926.

Dated at Regina, Saskatchewan, this fifteenth day of March, 1926.

W. M. Graham,

Indian Commissioner.

### Here and There

Canada has officially invited the British Dominions and colonies and all foreign powers to attend the world's poultry congress at Ottawa, which is to be held from July 27 to August 4, 1927. Three thousand delegates are expected to attend.

Canadian construction contracts for the month of January total \$12,690,000 as compared with \$5,951,700 in January 1925. This record for January indicates that winter construction is rapidly increasing in favor.

Model Grass poloathlons at Prince George started off along the River and have made the Ancient Capital famous throughout the continent. This year the activities were conducted even more interesting by the fact that the city is now at the height of its winter sports celebration.

Two more cases of automobiles crashing through gates at level crossings at Chelsea Road, Hull, Quebec, have been reported. On January 6, an automobile bus, laden with passengers, was driven through both gates. The driver explained that his windshield was frozen. The second case occurred February 3, when a car ran past just as the gates were being lowered. Both cars were damaged.

Addressing the members of the Canadian Lumbermen's Association at their eighth annual convention banquet at Montreal recently, E. W. Beatty, K.C., President of the Canadian Pacific Railway, stated that the 1925 income tax would collect from \$42,000,000 to \$45,000,000. Mr. Beatty declared that a reduction of 25 per cent, or \$11,000,000 might be brought about if the government expenses were cut. The Canadian Pacific Railway had reduced its expenses by over double that amount in one year, and the railway company was not as large as the Dominion of Canada.

### The United Church

"The Challenge of the First Palm Sunday" will be the subject of the message at the morning service in the United Church next Sunday, March 28.

In the evening service at 7:30 o'clock, the pastor will continue the special series of Sunday evening sermons on "Jesus Who Brought Jesus to the Cross," the special subject for next Sunday evening being "Pilot the Governor or a Study in Moral Cowardice."

The choir, under the direction of W. G. Moffatt, will render special and appropriate music at both of these services.

Special Passion Week services will be held in the United Church on Tuesday, Wednesday, Thursday, and Friday evenings of this coming week, at 8 o'clock. All are cordially invited to share with us in these special appropriate and helpful services.

### Four Square Gospel

We preach Jesus Christ, and Him crucified.

Sunday, March 28th:

11 a.m. Worship.

2:30 p.m. Sunday school and Bible class.

3:15 p.m. Evangelistic. Subject, "Killing the Camel."

7:30 p.m. Subject, "Second half of brand new."

Week nights, 8 o'clock:

Monday, Orchestra practice.

Tuesday, Evangelistic.

Wednesday, Young People.

Friday, Prayer meeting at Bro. Heyland's.

Full salvation for body, soul and spirit. Come as you weary, sick and sad ones, Jesus will give you rest for your soul and healing for your body.

Good music and singing. Come and bring a friend.

Calgary—Macleod.

Music Course.

Instruction given on the Violin, Flute, Clarinet, Cornet, Trombone, Banjo, Guitar, Mandolin, Piano, Organ, Harmony and Conducting.

## Cow Testing Associations Invaluable Aid to Milk Production

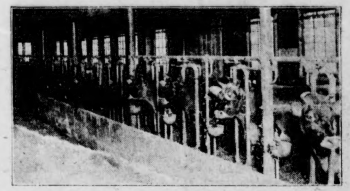

Illustration of cow testing association from which helps increase net profits.

Getting more milk from fewer cows is the aim of the cow testing association. Hundreds of cases have demonstrated in a most striking manner that the breeding stock of non-productive milk cows and better care for the producing members of the milk herd pay dividends.

This point was strongly stressed in an exhibit at the International Dairy Exposition held at Indianapolis last October. An actual instance was given which disclosed the following facts:

A milk producer had a herd of six milk cows producing 27,000 pounds of milk annually. He joined a cow testing association. The first also taken was to weed out the non-productive cows, that is, those cows yielding insufficient milk to net a profitable income over and above feed cost.

The weeding out process left only four cows in the milk herd. But these remaining cows were fed according to their individual requirements. No surplus or a profit of feeding measure was neglected. During the following months, they were given plenty of clean feeding, stable and were kept clean, the long hair on flanks and udders were kept trimmed. The

cows were trimmed or wiped with a damp cloth before each milking. Utensils were sterilized. The stable was well ventilated and plenty of clean, pure water was given the cows. A year from the time the member joined the association, his records showed an increase in milk to more than 23,000 pounds from the four cows as compared to 27,000 pounds from six cows prior to this period. There was more than a corresponding increase in net profits.

The cow testing association, comprised of about twenty farmers who cooperate and employ a registered tester to test their cows for recommended production of milk and butterfat. The tester spends one day a month on each farm and obtains a complete record of each cow's milk and butterfat production, feed consumed, feed cost, growth, and income, and income record.

The first cow testing association in the United States that was organized at Newsgate County, Michigan, in 1905. Since then, there has been a fairly constant growth, and 1925 shows a tally of 732 cow testing associations with section prospects of the number doubling within the next three years.

### A FINE BATHROOM

Modern fixtures have another advantage: they are easier to keep clean than the old-fashioned kind. Those beautiful smooth white surfaces can be kept in a glossy condition with very little care—and there are no difficult corners where only a fairly constant growth of dirt can successfully. Drop in and see our display of bathroom fixtures.
